

This diversion of resources is no different in contributing to deaths related to an increase in; untreated and undiagnosed cancer, heart attacks, weight gain related illnesses, and other neglected and postponed medical procedures, including surgery.

Lack of exercise, depressions, anxiety, a massive increase in suicides<sup>18,21</sup>, increased drug use, domestic violence, the destruction of livelihoods, and devastation of businesses are all direct consequences of not covid, but lockdowns.

Sadly, it's the elderly who are most vulnerable to lockdowns as the isolation hits them hardest. Denied access to the joy of seeing grandkids play, of being cuddled, of laughing with loved ones, and of much need exercise during the final days of their life, is a grave crime. Many forced to die alone for some whimper of an excuse toward greater good. That's just not right. There is more to life than avoiding death, and lockdowns not only create more death, but destroy life as well. In light of a plethora of ever growing evidence, we can safely say, enough is enough. It's time to live again.

## The Numbers

**"Cases"** - Everyday we are told case numbers. But the figures are misleading. Firstly, in response to increased testing, there will obviously be more cases. To the media, this is a chance to raise the alarm. To the sane person, this demonstrates a reduction in the relative severity of the virus per capita. The more asymptomatic people who test "positive", the more mild the virus per capita.

An increase in case numbers without deaths has **shown positive signs**, by revealing a much lower death to infection ratio than initial thought.<sup>13</sup>

On top of that, according to Dr. Michael Mina, an epidemiologist at the Harvard T.H. Chan School of Public Health, as many as 90% of positive PCR test results are non-contagious. This is due to **unusual practices**, promoting a high PCR cycle count, which increases test sensitivity.<sup>14, 15</sup>

**Deaths** - Increased case numbers have reduced the infection to death ratio, demonstrating a much less virulent problem than initially announced. But these numbers are significantly lowered again when we see how deaths are recorded.

The CDC reported a whopping 94% of all covid deaths are people who have died *with* covid, not necessarily *of* covid. Of that 94%, the average number of comorbidities is 2.6.<sup>16</sup> While it is impossible to know exactly what role covid played in any of those deaths, it is ludicrous to label in each case, that covid was the cause of death. To present it as such is deceptive.

See **Sect 109** of the **Australian Constitution**.

"When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid."<sup>32</sup>

We can not allow Government to trash human rights whenever they feel, or in response to this misreported "pandemic." "Emergency Powers" do not override any of this.

For a fuller list of the unprecedented legal abuses committed by Government at this time, see "Sources."

## The Future

Based on flawed computer modelling, initial Gov. estimates for covid death rates were **2-3%**. Not even remotely in the ballpark. When real life data revealed a drop to av. **0.0017%**<sup>33</sup> for people under 70 - far less than flu est. **0.13%**<sup>34</sup> - Government did not breathe a sigh of relief. Instead they ramped up SWAT teams and restrictions like it was Christmas. Even in light of new data, Western Australia rushed to secretly sneak through new laws where "authorities" can literally pin you down and stick you with a needle containing any potential cocktail.<sup>23</sup> The rules and responses have been totally overblow, absurd, arbitrary, and wildly inconsistent.

It's hard to believe Governments do not have the same access to peer reviewed journals, statistics, and professional opinion as the rest of us. So why are they behaving so erratically, concealing and ignoring glaring data? And why have they not done what was obvious?

The solution is, and always has been simple. Give the most vulnerable members of society the *option* to be isolated, (as not everyone prefers to be deprived of human connection with family and friends, spending their last days alone and in fear.) Direct resources toward that end. Dose them up first on liposomal Vit C and Zinc and other immune boosting supplements, then do the same for the rest of us. Then let people get on with their lives. It should have always been this easy.

## Sources

Thanks for taking the time to read this compacted little brochure. You may like to read it twice. Unfortunately quite a lot had to be omitted, and this is just the tip of the iceberg. Challenge everything you have read here, as well as everything you are told to believe by the state and media. If you find anything to be inaccurate or false, please direct all comments to bluebird2020@tutanota.com At the link below you will find the source file for reproduction, as well as the bibliography, and additional resources.

# CV-19 Lockdowns

## It's Time To See

There's been a lot of doom and gloom about the covid pandemic, but as time passes, more and more information has come to light about its effects on individuals and society.

As such, we see the Corona virus, while leading to many tragic deaths, is not half as bad as initially thought. On the contrary, lockdown measures have caused disproportionate, and immeasurable devastation, emotionally and economically. We must put everything in perspective if we hope to regain our freedom, health, and our Australian way of life.

With a clear lens we can better assess the Government response, and whether it has been effective or in need of radical change.

With aggressive Government censorship, complete control of all mainstream and social media, as well as a range of wild conspiracy theories, a clear view can be difficult to decipher.

The purpose of this little brochure is to show that somewhere in that mess, lie the valuable keys that could allow us to return safely to a normal life, where families, friends and workers can breathe easy and enjoy the freedom to live, to be happy, and to return to the life they choose once again.

Let's lay it out.

## Lockdowns. Do they even work?

2

**"Lockdowns that we were told were essential can no longer be justified in light of what we now know about covid19."** Dr. Martin Feeley - clinical director of Midland Fields Hospital Group & senior executive of HSE, Ireland.<sup>1</sup>

It started with 14 days to flatten the curve, to ease a burden on hospitals that never came; and that somehow escalated to 6+ months of restrictions, and **indefinite lockdown** with now proposed arbitrary, authoritarian and **unlawful detention** of Victorian citizens.<sup>3</sup>

This is in spite of growing evidence, that the virus is actually far more mild than initially estimated, and that lockdowns are ineffective. Below is a list of countries and regions demonstrating absolutely no correlation between lockdowns, "cases" or deaths.<sup>5</sup> (See 'Sources' for graphs, similar correlation and more info on mask mandates.<sup>7, 9, 40</sup>)

"Countries that locked down hard and those that did not have widely varying mortality rates. In the first group are Peru (907 deaths/million), Belgium (854), Norway (49) and Australia (30). The second includes Sweden (577), Belarus (76), Taiwan (0.3) and Vietnam (0.4). A wide range can also be seen among US states, from New York (1,701) and Massachusetts (1,326) with tough lockdowns, to North and South Dakota (205, 196) with no lockdowns. Forget causality; there's not even a clear correlation in either direction. This makes it easy to cherry-pick examples to fit the preferred narrative."<sup>4, 5, 6, 40</sup>

The Lancet Journal also reports that, **"Lockdown and widespread covid testing, were not associated with reductions in critical cases and overall mortality."**<sup>2</sup>

In addition, when death are analysed using actual mobility data, correlations are reversed!<sup>10, 11, 12</sup> Meaning lockdowns are likely causing higher "cases" and corona deaths. This unusual result is possibly due to increased stress, anxiety, lack of movement, recirculated air,<sup>20</sup> and the amplification bacteria and mold from warm, moist masks.

### Devastating consequences -

The consequences of Lockdowns are becoming harder to ignore. Diversion of critical health resources threatens to derail years of progress fighting global disease, leading to an estimated additional 1.4 mil TB deaths, 385,000 Malaria deaths & 500,000 AIDS deaths globally.<sup>8</sup>

## Vaccines and Solutions

4

**Hydroxychloroquine** - is a ubiquitous and inexpensive treatment proven to be highly effective against covid-19, in combination with antibiotics azithromycin or doxycycline and the nutritional supplement zinc.<sup>35</sup>

Anthony Fauci - a man who at best, is happy to lie through his teeth to manipulate public behaviour regarding masks<sup>15</sup>, and who suppressed AIDS treatment in 1987 that led to at least 17,000 needless deaths<sup>17</sup> - has once again, spoken out against a highly effective treatment.

Meet Harvey Risch, renowned professor of epidemiology at the Yale School of Public Health and Yale School of Medicine, as well as editor and board member for many prestigious journals and magazines.

Risch is in disbelief with the bizarre and hostile government / media stance on Hydroxychloroquine. He explains how the drug has been used safely and successfully in medicine for over half a century.<sup>35, 36, 37</sup> Yet now, when it could help most, it's suddenly considered dangerous.

He states that there is "overwhelming scientific evidence" for its use in the treatment of covid-19, citing at least 53 peer reviewed studies which have confirmed the safety and benefit of Hydroxychloroquine in the treatment of covid-19. But instead, he is left wondering **why on Earth the "overwhelming scientific evidence" is ignored** by governments, causing tens of thousands to die needlessly.<sup>35, 36, 37</sup>

Risch is far from the only outspoken specialist on the matter.<sup>19, 39</sup> And HClQ is far from the only effective treatment out there.<sup>22</sup> So why are the pleas of so many highly respected figures ignored? And why instead, do Governments - who claim to be so rigorous with the health of the population - eagerly push to mandate a brand new, radical, and untested type of vaccine, to every living being on the planet. One which likely poses serious health risks, and threatens to allow trigger happy politicians<sup>23</sup> the ability to potentially begin rewriting our very DNA.

**mRNA Vaccine** - Vaccines are an ancient, no doubt very useful tool for building immunity against viruses.

But what Governments are hoping to bounce off the back of the covid panic, is the brand new, highly controversial mRNA vaccine. This type of vaccine is being rushed through development, bypassing traditional scientific testing protocols,<sup>24, 25</sup> and has **never** been used on human beings before. In spite of this, we're told that forcing it upon the entire global population is the only way they will allow us to have our normal lives back - as if it were theirs to give.

As is the case with any bleeding edge technology - there are significant risks involved with genetic manipulation. Epigenetic studies have demonstrated the passing of altered gene expression down the generational lineage.<sup>28</sup> As such, the long term health risks, and ethical dilemma, is compounded exponentially.

Medical speculation of potential consequences include, genetic mutations, cancer, and side effects relating to any of the other thousands of reactions and proteins regulated by DNA and RNA. This is unknown territory, ethically and scientifically. The potentially catastrophic consequences of coercive tinkering with our very DNA, is a road we cannot turn back from so easily.<sup>24, 25</sup>

## Censorship and Law

### Blanket Censorship -

Free speech is the cornerstone of any healthy society. Sadly, Government suppression of free media and speech, supposedly justified by covid, is now in full force in Australia.<sup>27</sup> The mainstream media, under government directive, is drumming the same fearful, dramatic story we all know so well, while simply labelling people with any differing views as "conspiracy theorists" in an attempt to shut down debate.

Facebook, **Google search**, Youtube, Twitter, and Reddit, are all under directives from Governments to not only remove or de-rank any contrary facts, opinions, groups, or healthy discussion from their platforms<sup>28, 29, 30, 31</sup> but also to exclusively promote Government approved propaganda.<sup>27</sup> Thankfully they cannot plug all the leaks of information, and they never will.

When the consequences of lockdown are ripping lives and sacred human rights apart, you deserve to hear the full scope of discussion. This extreme and unjustified authoritarian attack on free speech should be ringing alarm bells.

Why, with such high stakes and dangerous expansion of power, are we to be kept in the dark to have our opinions drilled with only a tiny fraction of the discussion?

### The Law -

The recent barrage of fines, arrests, and terrifying home invasions; against the right to free speech, the right to freedom of peaceful protest, and the right to medical sovereignty - at the hands of the state, are all highly illegal actions. In time, Government will be forced to answer for these crimes.

Politicians are exerting power by force, and not by law. State laws do not override; Commonwealth laws, the Constitution, the Charter of Human Rights, or the Bio Securities Act. Writing a desired law down and directing police and civilians to follow it does not make it valid.
